• Doctor of Preventive Medicine (2022)

• Funded trader with FTMO & The5ers

• Venture research & DeFi community

• Self-built trading & fintech tools

About me

I am a preventive-medicine graduate who now manages funded trading accounts for FTMO and The5ers, working every day under strict daily-loss and drawdown limits. Medical training at Can Tho University of Medicine and Pharmacy gave me a foundation in evidence-based, quantitative thinking; venture research and DeFi community work then drew me into financial markets, where I have since built a verified track record of consistent, risk-controlled trading.

My ambition is to become a professional fund manager. Trading under proprietary-firm rules has taught me discipline, risk control and consistency; what I need next is a rigorous, internationally recognised academic grounding in investments, corporate finance and risk management, which is why I am applying to the Master of Finance at Massey University.

WHY MASSEY

Master of Finance (MFin) – Massey University

An internationally recognised finance qualification, a global professional network and the chance to grow as a global citizen: the foundation for a fund-management career that reaches beyond Viet Nam.

Education

Doctor of Preventive Medicine

Can Tho University of Medicine and Pharmacy

📅 2016 – 2022 📍 Can Tho, Viet Nam 🎓 Medical degree

- Full-time medical degree covering clinical medicine, epidemiology, biostatistics and public health; degree conferred July 2022.
- Developed a rigorous, evidence-based and quantitative approach to problem solving that I now apply to financial analysis.

Business Administration – Professional Training

PR Coaching Joint Stock Company

📅 2024 – 2025 📍 Viet Nam 🎓 Course certificate

- Practical training in business administration: strategy, operations, marketing and financial fundamentals.
- Course certificate awarded November 2024.

Experience

Funded Trader (Proprietary Trading Accounts)

FTMO · The5ers

📅 2025 – Present 📍 Remote 🏢 Proprietary trading

Current

- Manage funded proprietary-trading accounts under strict risk parameters, including daily-loss and maximum-drawdown limits.
- Follow a systematic risk-management process: pre-defined risk per trade, position sizing, trade journaling and regular performance reviews.
- Track record: FTMO Prime Trader status and Silver-tier overall rewards of USD 19,684 (April 2026); The5ers cumulative payouts of USD 9,533 (December 2025).
- Research, test and refine trading strategies, supported by Python-based analysis.

Researcher

BlackMamba Venture

📅 2024 📍 Remote 🏢 Venture research

- Researched and evaluated early-stage blockchain and fintech projects, covering tokenomics, team, market size and competitive landscape.
- Produced concise research reports to support investment decisions.

Ambassador

Roseon Finance

📅 2023 📍 Remote 🏢 DeFi · Community

- Represented Roseon Finance to the Vietnamese community: introduced the product, answered user questions and relayed feedback to the team.
- Created educational content on DeFi and digital-asset fundamentals to help new users get started safely.

Projects & Portfolio

A selection of tools I have built to solve real problems in finance, trading and tax compliance.

SoloTax

2026

In development

Mobile app that helps Vietnamese freelancers work out which tax category they fall into, estimate what they owe and follow a step-by-step compliance checklist, driven by a rule-based engine that models the current tax rules.

React Native

Expo

TypeScript

Rule-based engine

MT5 Trade Copier & Risk Dashboard

2025 – 2026

In daily use

Master/slave trade copier for MetaTrader 5 with a web dashboard, built around risk control: every copied trade is sized from a pre-defined risk per account rather than a fixed lot, stop-loss and take-profit levels stay synchronised across all accounts, and the dashboard tracks results, drawdown and trade statistics across accounts and strategies to support disciplined, data-driven reviews.

MQL5

Python

TypeScript

MetaTrader 5

Funding-Rate Arbitrage Scanner

2024

Completed

Browser-based tool that scans perpetual-futures funding rates across crypto exchanges and highlights potential funding-rate arbitrage opportunities.

JavaScript

Exchange APIs

Crypto derivatives

Tax Intelligence Pipeline

2026

In use

Local system of three services that collects tax news from RSS and web sources, analyses policy changes and builds a traceable repository of legal documents to feed SoloTax.

Data pipeline
